

IN THE SPECIFICATION

Please insert the following new heading and paragraph at page 1, line 4:

CROSS REFERENCES TO RELATED APPLICATIONS

This application is a national stage application of International Patent Application No. PCT/FR03/002458, filed on August 4, 2003, and claims priority to French Patent Application No. 02/10021, filed on August 6, 2002, both of which are incorporated herein by reference in their entireties.

Please delete the Abstract at page 10 in its entirety and insert therefor the following new Abstract on a separate sheet as follows:

ABSTRACT

The present invention relates to a process for the formation of a coating on at least a portion of a plastic substrate, characterized in that it is carried out at a temperature at least equal to the maximum temperature of use of the coated substrate minus 20°C. The invention also relates to a product thus obtained with a minimum mean coating thickness of 2 μm and to the application of this product as vehicle body part, transportation vehicle window, window for the construction industry or street furniture, safety window or window which is resistant to heat.
